

Thank you for registering your Spec Credit. We want to make the process as easy as possible. You will need to complete a separate registration form for each project or specification.

To ensure this credit, please remember to use your Rep Number as the prefix to the part number.

If you are unsure of your Rep Number or have any questions regarding this form or your registration, please contact our Quotations Manager, National Sales Manager, or call us at (586) 774-5650.

****NOTE: Proof of project specification must be provided when filing for a United Lighting Standards Spec Credit for it to be guaranteed.**
